PURELY POWERFUL

RAKA FIRST CIRCLE / CARE NOTES 01

# 7 Days to Better *Hair-Care Habits.*

A week of practical ideas. Not a miracle routine, not a medical treatment - just a more considered way to care for your hair.

DAY 01

## Understand your starting point

Notice whether your main concern is dryness, tangling, breakage, visible flakes, or shedding. Different concerns may have different causes.

**YOUR PRACTICE Write down your hair-care goals and current routine.**

DAY 02

## Wash with intention

Choose washing frequency based on your scalp and hair needs. Avoid aggressive scrubbing and use a cleanser suited to your routine.

**YOUR PRACTICE Notice how your scalp feels after washing.**

DAY 03

## Detangle more gently

Rough brushing and pulling can contribute to hair breakage. Work carefully through tangles in smaller sections.

**YOUR PRACTICE Detangle without forcing knots.**

DAY 04

## Give hair a break from heat

Frequent high heat can damage hair fibers. Lower temperatures, heat protection, and fewer styling sessions can reduce avoidable damage.

**YOUR PRACTICE Try an air-dry or lower-heat styling day.**

DAY 05

## Pay attention to your scalp

Persistent itching, burning, painful bumps, or flaking can need assessment. Dryness and dandruff are not the same thing.

**YOUR PRACTICE Note persistent symptoms instead of testing several new products.**

DAY 06

## Protect against unnecessary tension

Tight styles and repeated pulling can stress hair. Choose comfortable styles and avoid tension on the same areas.

**YOUR PRACTICE Select a hairstyle that does not pull or hurt.**

DAY 07

## Make your routine sustainable

Keep a few realistic care habits. Sudden, patchy, progressive hair loss or ongoing scalp symptoms merit medical advice.

**YOUR PRACTICE Choose three habits to maintain over the next month.**

### ONE LAST THING

Hair shedding, breakage, scalp dryness, dandruff and different forms of hair loss can need different approaches. This guide is general education; it does not diagnose, treat or promise regrowth. For sudden, patchy, progressive hair loss or persistent scalp problems, seek qualified medical advice.
