PRE-LAUNCH LANDING PAGE

RAKA Hair Treatment Oils

Conversion-focused website content, UI/UX structure and SEO direction for the first two 200ml treatment oils.

Products: Hair Fall Control Treatment Oil | Scalp & Hair Growth Treatment Oil

Primary objective: Build pre-launch demand, collect qualified leads and position RAKA as a premium, treatment-led hair-care brand in Pakistan.

PAGE STRATEGY

What this landing page needs to achieve

The page should feel premium and focused, not like a crowded herbal-oil marketplace listing. Every section should answer one buyer question and move the visitor toward early access.

Conversion goals

Clarify the difference between the two treatments immediately.

Build trust through formulation, manufacturing standards and careful claim language.

Collect email/WhatsApp leads before stock becomes available.

Create SEO relevance around hair fall, scalp care, rosemary hair oil and healthier-looking growth.

Core UX principle

One screen, one idea. Use generous whitespace, large product imagery, short copy blocks and repeat the primary CTA at natural decision points.

SECTION 01 - HERO

Stronger Hair Starts With Better Care.

Two targeted treatment oils. Two different hair concerns. One thoughtful approach to healthier-looking hair.

HAIR FALL CONTROL

Helps strengthen fragile, breakage-prone hair and supports a smoother, healthier-looking finish.

SCALP & HAIR GROWTH

Nourishes the scalp and supports stronger, fuller, healthier-looking hair.

Launching Soon in Pakistan.

Purposeful Botanical Formulas	**No Silicones**	**No Parabens**	**No Mineral Oil**

Recommended hero microcopy

Premium scalp and hair treatment oils developed for modern routines - with focused formulas, considered ingredients and a lighter treatment experience.

SECTION 02 - BRAND APPROACH

Hair Oil Should Do More Than Make Hair Look Shiny.

Traditional oiling has always been part of hair care in Pakistan. But heavy texture, excessive greasiness and one-formula-for-everything products do not always fit modern hair routines.

RAKA takes a more focused approach.

Our treatment oils are developed around specific hair and scalp concerns, combining familiar botanical ingredients with a more considered treatment experience.

The goal is not simply to coat your hair with oil. It is to help build a better routine for scalp care, strength, softness, breakage control and healthier-looking growth.

TARGETED

Two formulas with clearly different primary concerns.

BOTANICAL

Recognisable hair-care ingredients presented with modern discipline.

PREMIUM

A refined product experience designed for contemporary routines.

Suggested visual direction

Use warm ivory space, restrained copper accents and close-up product photography. Avoid crowded herbal graphics, excessive green leaves, pseudo-clinical diagrams or aggressive before/after claims. The visual tone should sit between premium beauty and credible botanical treatment.

SECTION 03 - PRODUCT 01

RAKA Hair Fall Control Treatment Oil

For weak, fragile and breakage-prone hair.

Hair fall is not always only about what happens at the root. Dryness, friction and repeated breakage can also make hair appear thinner and increase visible shedding.

RAKA Hair Fall Control Treatment Oil is created to nourish and condition weakened hair while helping improve strand strength, softness and manageability.

Hero ingredients: Rosemary · Arnica · Jaborandi · Biotin · Onion · Peppermint

Concern	Treatment Focus
Breakage-related hair fall	Helps strengthen fragile strands and improve resilience.
Weak-feeling hair	Supports stronger, healthier-looking hair from root to tip.
Dryness	Helps replenish softness and conditioning.
Rough texture	Helps smooth strands and improve manageability.
Dull hair	Enhances a healthier-looking natural shine.
Split-prone ends	Helps condition dry and damaged-looking ends.

The result

Hair that feels stronger, smoother and better conditioned - with less breakage during the everyday routine.

SECTION 04 - PRODUCT 02

RAKA Scalp & Hair Growth Treatment Oil

Scalp-focused care for stronger, fuller-looking hair.

Healthy-looking hair begins with consistent scalp care. RAKA Scalp & Hair Growth Treatment Oil is developed to nourish and condition the scalp while supporting stronger roots, improved hair quality and healthier-looking growth.

It is designed for people who want more than surface-level shine - especially when the scalp feels dry, hair feels weak or maintaining length has become difficult.

Hero ingredients: Rosemary · Arnica · Jaborandi · Biotin · Onion · Peppermint

Concern	Treatment Focus
Dry-feeling scalp	Helps nourish and condition the scalp.
Weak-feeling roots	Supports stronger-looking hair and a better-conditioned scalp.
Poor length retention	Helps minimise breakage that can affect retained length.
Dull hair	Supports smoother, healthier-looking strands.
Fragile hair	Helps improve softness and resilience.
Fuller-looking hair goals	Supports a consistent scalp and hair-care routine.

The result

A better-conditioned scalp with stronger, softer and fuller-looking hair over time.

SECTION 05 - DECISION SUPPORT

Which RAKA Treatment Is for You?

Two treatments. Choose by your main concern.

	HAIR FALL CONTROL	SCALP & HAIR GROWTH
Main concern	Breakage and visible hair fall	Scalp care and healthier-looking growth
Best for	Weak, fragile, breakage-prone hair	Dry scalp, weak roots, poor length retention
Core focus	Strength + breakage control	Scalp nourishment + growth support
Routine emphasis	Scalp + lengths	Primarily scalp + roots
Finish goal	Stronger, smoother hair	Fuller, healthier-looking hair

Still not sure?

Choose Hair Fall Control

If your biggest concern is hair breaking or falling during brushing, washing or styling, start here.

Choose Scalp & Hair Growth

If your priority is scalp care, stronger-looking roots and healthier-looking growth, start here.

UX note

Place this comparison relatively early on mobile. It answers the highest-friction purchase question: “Which one is for me?”

SECTION 06 - INGREDIENT STORY

Familiar Botanicals. Purposeful Selection.

Rosemary

A widely used botanical in modern scalp-care routines, selected for its role in conditioning the scalp and supporting healthier-looking hair.

Arnica

Traditionally used in hair and scalp preparations and included as part of RAKA's botanical conditioning system.

Jaborandi

A traditional botanical commonly associated with scalp and hair-care formulations.

Biotin

Included as part of a strengthening-focused hair-care formula designed to support the appearance and feel of healthier strands.

Onion

A familiar ingredient in South Asian hair-care routines, incorporated into the treatment blend for scalp and hair conditioning.

Peppermint

Provides a fresh sensory experience while complementing a scalp-focused treatment routine.

What RAKA leaves out

NO SILICONES | **NO PARABENS** | **NO MINERAL OIL**

Keep these claims only if the final production formula and supplier documentation support them.

SECTION 07 - ROUTINE

How to Use RAKA Treatment Oils

A simple routine that works for scalp treatment, daily conditioning and dry ends.

FOR SCALP TREATMENT	FOR DAILY USE	FOR SPLIT-PRONE ENDS
Step 1 Part the hair into sections and apply a suitable amount directly to the scalp and roots.	Step 1 Take a few drops into the palms.	Step 1 Apply 1-3 drops to the fingertips.
Step 2 Massage gently using circular motions for 3-5 minutes.	Step 2 Smooth lightly through the mid-lengths and ends.	Step 2 Gently smooth over dry and split-prone ends.
Step 3 Leave on for 30-60 minutes or longer as preferred, then shampoo thoroughly. Use 2-3 times per week.	Step 3 Leave in and style as usual. Use only a small amount for a lightweight finish.	Step 3 Leave in to improve softness, smoothness and the appearance of damaged ends.

Routine microcopy

Consistency matters more than excess. Use the amount your scalp and hair need, and adjust frequency according to your hair type, scalp condition and wash routine.

SECTION 08 - TRUST & QUALITY

Made With Quality in Mind.

Beautiful packaging means very little without disciplined manufacturing behind it. RAKA treatment oils are produced under controlled manufacturing standards with a focus on formulation consistency, hygiene and product quality.

DRAP-REGISTERED FACILITY

Manufactured in a facility registered with Pakistan's Drug Regulatory Authority. This wording should match the exact status shown in the current registration documents.

GMP-CERTIFIED MANUFACTURING

Produced under Good Manufacturing Practice controls designed to support consistent production, hygiene and quality management.

PCSIR SUPPORTING DOCUMENTATION

Use only the exact PCSIR certification, testing or report claims that are supported by the current documents for the product or manufacturing process.

Claim language to avoid

Avoid “DRAP Approved” unless the individual product has that specific approval and you can document it.

Avoid “RAKA is DRAP Certified” if the registration belongs to the manufacturing facility.

Avoid broad “PCSIR Certified” wording unless the exact certificate scope supports that statement.

Avoid guaranteed regrowth, permanent hair-fall cure or medical treatment language without suitable evidence and regulatory basis.

SECTION 09 - BRAND STORY

Why RAKA?

Inspired by Rakaposhi, one of Pakistan's most distinctive natural landmarks, RAKA represents strength, purity and a higher standard of personal care.

We are building RAKA for customers who want more from hair oil than tradition alone.

Better formulation thinking.
Better treatment positioning.
Better presentation.
A product experience designed for modern routines.

Rooted here. Made for what comes next.

Pre-launch lead capture

Pre-launch members can receive launch-day access, introductory pricing, limited first-batch availability, product education and early bundle access. Use only benefits you genuinely plan to offer.

SECTION 10 - FAQ

Questions Buyers Are Likely to Ask

Is RAKA Hair Fall Control Oil for all hair types?

Yes. It is designed for different hair textures, including straight, wavy, curly and coily hair. The amount and frequency should be adjusted according to the hair's needs.

What is the difference between the two oils?

Hair Fall Control focuses on strengthening fragile strands and helping minimise breakage-related hair fall. Scalp & Hair Growth focuses more heavily on scalp conditioning, stronger-looking roots and healthier-looking growth and length retention.

Will RAKA stop hair loss?

RAKA is a cosmetic hair-care treatment, not a medical treatment for hair-loss disorders. It is designed to support stronger, healthier-looking hair and help minimise hair fall associated with dryness and breakage.

How often should I use it?

For a full scalp treatment, 2-3 times per week is a practical starting point. Usage can be adjusted according to scalp condition, hair type and routine.

Is it suitable for men and women?

Yes. Both formulas are positioned around hair and scalp concerns rather than gender.

Where is RAKA made?

RAKA products are manufactured in Pakistan under controlled quality and manufacturing standards.
